Re: Cardiology Referral — Stress Test

Patient Information

Name	James West
Date of Birth	1968-12-26
Phone	412-555-6227
Address	6670 Bruce Stream Suite 133 Beaver, PA, 15009
MRN	MRN-178108

Insurance

Primary Payer	Highmark BCBS PA
Primary Member #	IU105183473
Secondary Payer	Aetna
Secondary Member #	W997376311

Reason for Referral

This 57-year-old female presents with a three-week history of exertional dyspnea that occurs with moderate activity such as climbing stairs or brisk walking. She reports associated mild chest discomfort described as pressure-like in nature, which resolves with rest. The patient denies orthopnea, PND, or lower extremity edema. She has a significant past medical history of hypertension managed with lisinopril and amlodipine, with generally good BP control. She is a former smoker with a 15 pack-year history, quit five years ago. Family history is notable for early CAD in her father, who suffered an MI at age 62. She denies prior cardiac workup or known structural heart disease.

On examination today, vital signs are stable with BP 138/82 and HR 78. Cardiac auscultation reveals regular rate and rhythm with no murmurs, rubs, or gallops. Lungs are clear to auscultation bilaterally. No peripheral edema or JVD appreciated. Resting EKG shows normal sinus rhythm with no acute ST changes or T-wave inversions, though there is mild nonspecific ST depression in the lateral leads.

Given her age, risk factor profile, and new-onset exertional chest discomfort with dyspnea, cardiac etiology must be excluded. I would appreciate your evaluation with stress testing to assess for inducible ischemia and further risk stratify this patient. Please advise on further management and any additional testing you deem necessary.

Requested Study & Coding

Requested Study	Stress Test
CPT Code	93015
ICD-10 Code(s)	R07.9, I10
Urgency	ROUTINE
Requested Follow-up	24 days

Sincerely,

Sherri Frazier, MD
