Re: Cardiology Referral — Echocardiogram (TTE)

Patient Information

Name	Kenneth Price
Date of Birth	1963-11-25
Phone	878-555-2927
Address	66909 Woods Knoll Butler, PA, 16001
MRN	MRN-937346

Insurance

Primary Payer	Aetna
Primary Member #	W873471434

Reason for Referral

This 62-year-old gentleman with a history of mild aortic stenosis presents for routine cardiology evaluation and echocardiographic assessment. He was initially diagnosed with AS approximately three years ago during workup for a systolic murmur noted on routine physical examination. Since that time, he has remained largely asymptomatic without exertional chest pain, dyspnea on exertion, or syncope. He denies palpitations or orthopnea. His past medical history is significant for well-controlled hypertension managed with lisinopril and amlodipine, and he maintains good functional capacity with no limitations on activity. He is a former smoker, quit approximately ten years ago, and denies significant alcohol use.

On examination today, vital signs are stable with BP 138/82 and HR 76 regular. Cardiac auscultation reveals a grade 2/6 systolic ejection murmur best heard at the right upper sternal border with radiation to the carotids, consistent with his known aortic stenosis. No diastolic murmurs appreciated. Lungs are clear to auscultation bilaterally, and there is no peripheral edema or JVD noted.

Given the interval since his last echocardiogram and the need to assess for any progression of his aortic stenosis, I am referring him for transthoracic echocardiography. I would appreciate your assessment of aortic valve area, mean and peak gradients, and left ventricular function. Please advise regarding need for endocarditis prophylaxis and any activity restrictions or follow-up recommendations.

Requested Study & Coding

Requested Study	Echocardiogram (TTE)
CPT Code	93306
ICD-10 Code(s)	I35.0
Urgency	ROUTINE
Requested Follow-up	17 days

Sincerely,

Christian Carter, MD
