Re: Cardiology Referral — Echocardiogram (TTE)

Patient Information

Name	Ashley Barnett
Date of Birth	1961-05-03
Phone	412-555-2103
Address	6945 Mariah Corners Suite 737 Pittsburgh, PA, 15237
MRN	MRN-354549

Insurance

Primary Payer	Highmark BCBS PA
Primary Member #	IBQ931491905
Secondary Payer	UPMC Health Plan
Secondary Member #	U06716572

Reason for Referral

Mr. [Patient Name] is a 65-year-old gentleman with a significant cardiac history including hypertension, type 2 diabetes, and known mild aortic stenosis initially detected approximately two years ago on prior echocardiography. He presents today for routine follow-up evaluation of his valvular disease. The patient reports stable exercise tolerance without new dyspnea on exertion, chest pain, or syncope. He denies orthopnea, paroxysmal nocturnal dyspnea, or lower extremity edema. His current medications include lisinopril, metoprolol, and atorvastatin, which he takes as prescribed with good compliance.

On physical examination today, vital signs are stable with blood pressure 138/82 mmHg and heart rate 68 bpm. Cardiac auscultation reveals a systolic ejection murmur at the right upper sternal border consistent with aortic stenosis, unchanged from prior documentation. No peripheral edema is noted, and lung fields are clear to auscultation bilaterally. Given the interval since his last echocardiographic assessment and the need to assess for any progression of his aortic stenosis, I am referring him for transthoracic echocardiography.

I would appreciate your evaluation of aortic valve morphology, severity of stenosis, left ventricular function, and any interval changes from his prior study. Please advise regarding the need for follow-up imaging intervals and any activity restrictions or medical optimization that may be warranted at this time.

Requested Study & Coding

Requested Study	Echocardiogram (TTE)
CPT Code	93306
ICD-10 Code(s)	I42.9
Urgency	ROUTINE
Requested Follow-up	10 days

Sincerely,

Matthew Davis, MD
